

Ways we can help school lunches today

By Simon Miller And Jason Morris

Drinks

At our school we use plastic milk cartons but we have an idea. We can bring our water bottles to lunch and use a drink machine like the ones at fast food restaurants with milk instead of soda.

silverware

For silverware we can use reusable forks, knives and spoons. For example,

- Metal
- Washable plastic
- Wood

Plates

Instead of using plastic plates we can use trays with spots for food in them. This way you still keep your from mixing up and you don't use plastic.

straws

At school right now we are using no straws, but we used to use plastic straws. But we can use reusable straws like metal or hard plastic.

napkins

At school we use paper napkins. After we are done we throw them out and it's a big waste. But we can use cloth napkins. We can even get them in school spirit colors.
